Topic: Campus Recruitment System (TalentTicK)

A college campus recruitment System that consists of a Student login, Company - login, Admin login. The project is benefited for college students, various companies visiting the campus for recruitment and even the college placement officers. The software system allows the students to create their profiles and upload all details including marks onto the system.

The admin can check each student details and can remove faculty accounts. The system also consists of company login where various company. The software system allows students to view a list of companies who have posted for vacancy.

The admin has overall rights over the system and can moderate and delete any students as well as company data and efficiently displays all this data to respective sides.

Company post there job vacancies and that job vacancies can verify by the placement officer and send appropriate vacancies for the students based on their mark. Student can view the vacancies and search job based on the company name when they are login to their accounts. Apply for the jobs then currently applied jobs are moved to the recently applied jobs. Applied job lists can see by the placement offers and they inform the corresponding company.

Vacancies posted by the company with details of specific post, salary location description and last date to apply after the last date over the job will disappear. Conduct Mock Test for students and display call letters for students.
